

BAKERSFIELD COLLEGE  
ASSOCIATE DEGREE PROGRAM  
B27 – Pediatrics

## Teaching Project

Students can work in groups with up to 3 students per group. The students will choose a topic affecting children in healthcare today. For example, diabetes. The students will prepare an educational brochure or pamphlet regarding that issue. The pamphlet needs to be understandable to the target population. Remember you are educating children!! You must specify the target population. Students must utilize current research to justify the education. You are required to have at least 2 references and 1 may be your text book. The pamphlet must be easy to follow and understand. The information must be accurate and up to date in order to receive credit. **This assignment is due by the last day of your clinical rotation. No late assignments will be accepted.**
